

How to Upload the entire Database or one Profile that was Shared from another MYLO User

I. Guidelines to Download

- 1. If You are the Person Receiving the Database or a particular Profile from Another Person this is how you upload the Profile into your App.**
 - a. You will receive email from dropbox.
 - b. Go to email and click view file and click three dots on top right
 - c. On the bottom of the screen click Save to my Dropbox then click save again
 - d. When it's saved you will see a big check mark
 - e. Now go back to MYLO and click *Add Profile* and then *Import from DropBox*, then click *Restore*.
 - f. **Click on the profile you want to upload. You will see a message Restore do you want to unzip.... SAY YES**
 - g. **Once done you will see the new profile automatically on your profile screen**
 - h. **When you click on the box you will be asked to assign a relationship – click the drop down and add relationship label.**
